4.2. BSD 3-Clause License

BSD 3-Clause License is a free and open source software license. It is based on the MIT License and is designed to be a simple, clear, and concise license that allows for the widest possible range of reuse of the software it covers. It is a permissive license that allows for the software to be used in both open and closed source projects, and it does not require the user to provide any attribution or to share their own source code.

Core Team

FreeBSD, NetBSD, and OpenBSD are all part of the BSD family. They are all based on the BSD 3-Clause License and are designed to be simple, clear, and concise licenses that allow for the widest possible range of reuse of the software they cover. They are all permissive licenses that allow for the software to be used in both open and closed source projects, and they do not require the user to provide any attribution or to share their own source code.
